

Henkie Tankie 2000 vacuum tank

The Henkie Tankie 2000 vacuum tank is an exceptionally versatile machine with the ability to suck heavy bentonite or sludge from the borehole.

The vacuum tank is specially designed for HDD applications.

With 127 cfm / 216 m³ / hour suction power, the HenkieTankie has more than enough power and suction.

The machine is standard on its own frame, but can also be mounted on, for example, a two-axle trailer or dump truck.

The Henkie Tankie is CE certified and has two connections: in addition to a connection at the back, the machine has an extra connection at the side.
